Mental Health (impaired memory): demographic perspective and the effects for municipalities

Dementia: demographic perspective and the effects for municipalities

World Health Organization (3 pillars)

- Encourage Participation
- Promote (Mental) Health
- Ensure Safety

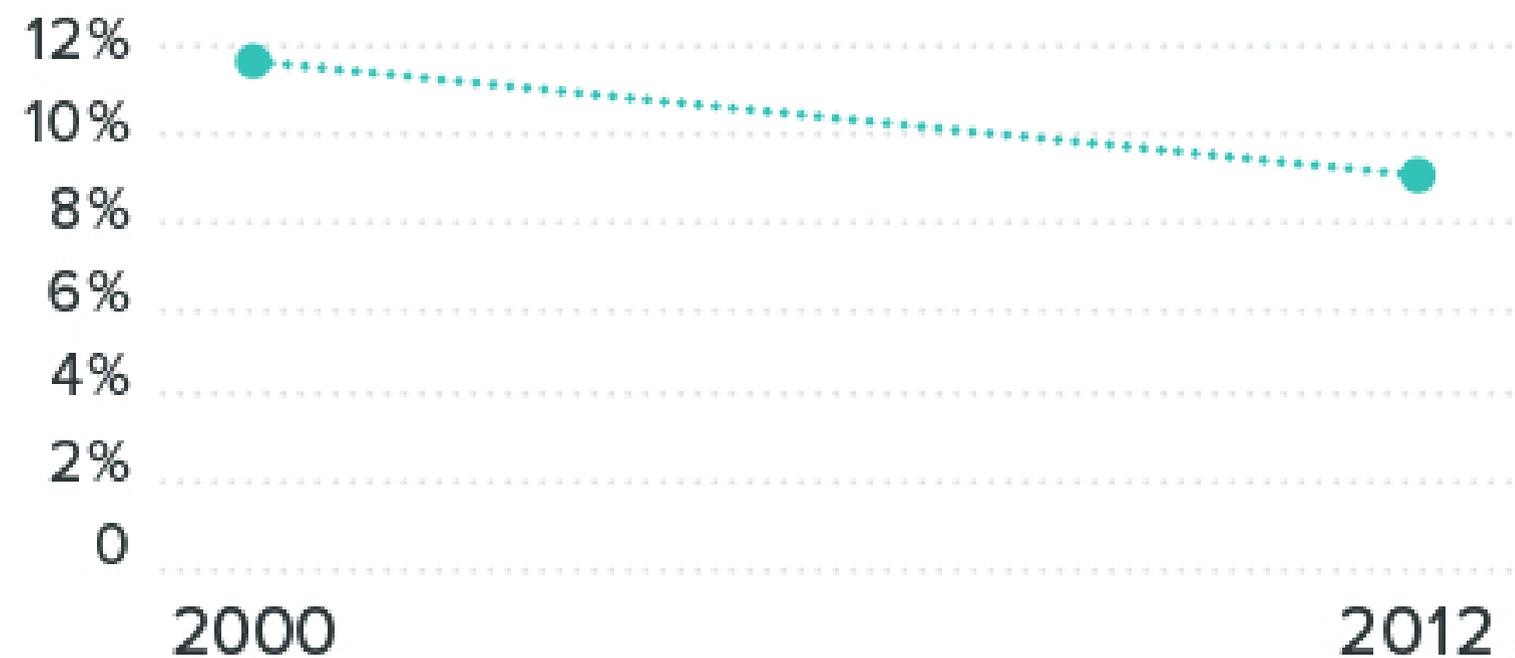

World Health Organization: active aging determinants

- Culture and Gender
 - Multiple tasks are decreasing attention
- Health promotion, disease prevention, adaptation, access to care
 - Agenda as useful memory aid
- Adopt healthy lifestyle
 - Medications and their consequences on memory
- Adapt physical environment
 - Fire detection to prevent consequences of forgetfulness
- Promote social contacts
 - Understanding memory to improve interindividual relationships

Usefulness of action programs

Dementia: demographic perspective and the effects for municipalities

Dementia Prevalence Among Those 65 Years or Older
